JEREMY GUTS

Junior Developer

I am a junior developer, artist, designer, musician, and parent. I am from Central New York and have lived in Seattle since 2005. I create a balance between my diligence to seeing projects through to keeping things light, fun, and sometimes hilarious.

Seattle Central Community College
Fall 2013 – Spring 2013
Philosophy/Ethics Small Business Management Business Law
Dean's List

WORK EXPERIENCE

Hospitality
Because of my experience in both front and back of the house over the course of my time in this field, I worked smoothly, under pressure and under short time restraints, I generally take a leadership role with newer employees and assist the supervisors in keeping each shift running smooth. Throughout this part of my life, I found it comfortable to wear different hats in the field and have jumped into any role that had been assigned to me.

Art/Design/Music
I have been in the creative field most of my life, from fine art, to design and illustration, to music. I have a working knowledge of Adobe Photoshop, Illustrator, and InDesign, as well as many other design and music digital platforms. I've worked on a varying range of projects from sign and menu design, to chalkboard displays and art curation. I've planned many events and performances as well as performing, and initially schooled in music recording and production.

Voice Over Artist
I have done many voice over projects over the years including language translation recordings for Coastal Kitchen, character voices for a video game promo, radio ads, business voicemail messages, and announcing/radio work.
